TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY
INDEX, VOLUMES 111–120
1964–1965

	Vol.	Pages
ADLER, R. L. Generalized commuting properties of measure preserving transformations	115	1–13
ADLER, R. L., KONHEIM, A. G. AND MCANDREW, M. H. Topological entropy	114_2	309–319
AHREN, P. R. Elementary methods in the theory of primes	118	221–242
ALLING, N. L. Rings of continuous integer-valued functions and nonstandard arithmetic	118	498–525
ALPERIN, J. L. Normalizers of system normalizers	113_1	181–188
—— Large abelian subgroups of p-groups	117	10–20
AMITSUR, S. A. Generalized polynomial identities and pivotal monomials	114_1	210–226
ANDERSON, L. W., HUNTER, R. P. and KOCH, R. J. Some results on stability in semigroups	117	521–529
ANDREOTTI, ALDO and NARASIMHAN, RAGHAVAN, Oka's Heftungslemma and the Levi problem for complex spaces	111_2	345–366
APPEL, K. I. and MCLAUGHLIN, T. G. On properties of regressive sets	115	83–93
BABBITT, DONALD. The Wiener integral and the Schrödinger operator	116	66–78
BACHMUTH, S. Automorphisms of free metabelian groups	118	93–104
BALSLEV, ERIK. The essential spectrum of elliptic differential operators in $L^p(R_n)$	116	193–217
BARBEAU, E. J. The principal semi-algebra in a Banach algebra	120_1	1–16
BARROS NETO, J. Spaces of vector valued real analytic functions	112_3	381–391
BAUM, L. E. and KATZ, MELVIN. Convergence rates in the law of large numbers	120_1	108–123
BEAN, R. J. Disks in E^3. I. Subsets of disks having neighborhoods lying on 2-spheres	112_2	206–213
—— Disks in E^3. II. Disks which "almost" lie on a 2-sphere	119_1	123–124
BECHTELL, HOMER. Elementary groups	114_2	355–362
BECK, ANATOLE. Plane flows with closed orbits	114_2	539–550

	Vol.	Pages
BERGER, M. S. An eigenvalue problem for nonlinear elliptic partial differential equations	120_1	145–184
BERKSON, EARL. Some types of Banach spaces, Hermitian operators and Bade functionals	116	376–385
BERMAN, S. M. Sign-invariant random variables and stochastic processes with sign-invariant increments	119_2	216–243
BERSTEIN, ISRAEL. On co-groups in the category of graded algebras	115	257–269
BING, R. H. Improving the Side Approximation Theorem	116	511–525
BISHOP, R. L. and GOLDBERG, S. I. Some implications of the generalized Gauss-Bonnet theorem	112_3	508–535
BLOCK, R. E. On Lie algebras of rank one	112_1	19–31
BLUMENTHAL, R. M. and GETOOR, R. K. Additive functionals of Markov processes in duality	112_1	131–163
BOEHM, BARRY. Convergence of best rational Tchebycheff approximations	115	388–399
BOSE, A. K. Functions satisfying a weighted average property	118	472–487
BRAGG, L. R. The radial heat polynomials and related functions	119_2	270–290
BROWDER, F. E. Nonlinear elliptic boundary value problems. II.	117	530–550
——— Multi-valued monotone nonlinear mappings and duality mappings in Banach spaces	118	338–351
——— Fixed point theorems on infinite dimensional manifolds	119_2	179–194
BROWN, E. H., JR. Abstract homotopy theory	119_1	79–85
BROWN, R. F. On the Lefschetz number and the Euler class	118	174–179
——— Path fields on manifolds	118	180–191
BUCHSBAUM, D. A. A generalized Koszul complex. I	111_2	183–196
BUCHSBAUM, D. A and RIM, D. S. A generalized Koszul complex. II. Depth and multiplicity	111_2	197–224
BUCKHOLTZ, J. D. Power series whose sections have zeros of large modulus	117	157–166
BUNGART, LUTZ. Holomorphic functions with values in locally convex spaces and applications to integral formulas	111_2	317–344
——— Erratum to "Holomorphic functions with values in locally convex spaces and applications to integral formulas"	113_3	547
BURGESS, C. E. Characterizations of tame surfaces in E^3	114_1	80–97
CARLITZ, L. and WHITEMAN, A. L. The number of solutions of some congruences modulo a product of primes	112_3	536–552
CARROLL, F. W. A difference property for polynomials and exponential polynomials on abelian locally compact groups	114_1	147–155
CASLER, B. G. On the sum of two solid Alexander horned spheres	116	135–150

	Vol.	Pages
CHANG, S. S. L. An extension of Ascoli's theorem and its applications to the theory of optimal control	115	445–470
CHAO, CHONG-YUN. On groups and graphs	118	488–497
CHERNOFF, HERMAN and TEICHER, HENRY. Limit distributions of the minimax of independent identically distributed random variables	116	474–491
CHU, HSIN and KOBAYASHI, SHOSHICHI. The automorphism group of a geometric structure	113_1	141–150
CHURCH, P. T. Factorization of differentiable maps with branch set dimension at most $n-3$	115	370–387
CHWE, BYOUNG-SONG. Relative homological algebra and homological dimension of Lie algebras	117	477–493
CLEAVER, F. L. On a theorem of Voronoï	120_3	390–400
——— On coverings of four space by spheres	120_3	401–416
COHEN, ECKFORD. Some asympotic formulas in the theory of numbers	112_2	214–227
COHEN, HASKELL and KOCH, R. J. Acyclic semigroups and multiplications on two-manifolds	118	420–427
COHN, P. M. Errata to "Noncommutative unique factorization domains"	119_3	552
COLE, R. H. General boundary conditions for an ordinary linear differential system	111_3	521–550
COMFORT, W. W. Retractions and other continuous maps from βX onto $\beta X \setminus X$	114_1	1–9
COMFORT, W. W. and GORDON, HUGH. Disjoint open subsets of $\beta X \setminus X$	111_3	513–520
CONLON, LAWRENCE. The topology of certain spaces of paths on a compact symmetric space	112_2	228–248
CULLER, G. J. On the polar equations for linear systems and related nonlinear matrix differential equations	118	390–405
CURTIS, C. W. and JANS, J. P. On algebras with a finite number of indecomposable modules	114_1	122–132
DAIGNEAULT, AUBERT. On automorphisms of polyadic algebras	112_1	84–130
DAVIS, J. R. On the extreme eigenvalues of Toeplitz operators of the Hankel type II	116	267–299
DEMAR, R. F. On a theorem concerning existence of interpolating functions	114_1	23–29
DEVINATZ, ALLEN. Toeplitz operators on H^2 spaces	112_2	304–317
DOUGLAS, R. G. and PEARCY, CARL. Spectral theory of generalized Toeplitz operators	115	433–444

	Vol.	Pages
DRAKE, DAVID and THRON, W. J. On the representations of an abstract lattice as the family of closed sets of a topological space	120_1	57–71
DUDLEY, R. M. On sequential convergence	112_3	483–507
——— Fourier analysis of sub-stationary processes with a finite moment	118	360–375
DUREN, P. L. On the Marx conjecture for starlike functions	118	331–337
DYE, H. A. On the ergodic mixing theorem	118	123–130
EBEY, SHERWOOD. The classification of singular points of algebraic curves	118	454–471
EDWARDS, C. H., JR. Concentricity in 3-manifolds	113_3	406–423
ELLIS, H. G. Solvability of ordinary differential equations near singular points	119_1	1–20
ENDERTON, H. B. Hierarchies in recursive function theory	111_3	457–471
ETTER, D. O., JR. Vector valued analytic functions	119_2	352–366
EVENS, LEONARD. On the Chern classes of representations of finite groups	115	180–193
FADELL, EDWARD. Generalized normal bundles for locally-flat imbeddings	114_2	488–513
FAITH, CARL. Orders in simple artinian rings	114_1	61–64
FAITH, CARL and UTUMI, YUZO. On noetherian prime rings	114_1	53–60
FEARNLEY, LAWRENCE. Characterizations of the continuous images of the pseudo-arc	111_3	380–399
FEDERER, HERBERT. Some theorems on integral currents	117	43–67
FEIT, WALTER. Groups which have a faithful representation of degree less than $p-1$	112_2	287–303
FELDMAN, E. A. The geometry of immersions. I	120	185–224
FELL, J. M. G. The dual spaces of Banach algebras	114_1	227–250
FESQ, R. M. Green's formula, linear continuity, and Hausdorff measure	118	105–112
FILLMORE, P. A. The dimension theory of certain cardinal algebras	117	21–36
FISCHER, P. C. Theory of provable recursive functions	117	494–520
FISK, D. L. Quasi-martingales	120_3	369–389
FIXMAN, URI. On algebraic equivalence between pairs of linear transformations	113_3	424–453
FOX, CHARLES. A formal solution of certain dual integral equations	119_3	389–398
FRANK, MARGUERITE. Two new classes of simple Lie algebras	112_3	456–482
FREEMAN, J. M. Perturbations of the shift operator	114_1	251–260
——— Volterra operators similar to $J: f(x) \to \int_0^x f(y)\,dy$	116	181–192

	Vol.	Pages
FREILICH, GERALD. Carathéodory measure of cylinders	114_2	384–400
GAMELIN, T. W. Restrictions of subspaces of $C(X)$	112_2	278–286
GELBAUM, B. R. Tensor products over Banach algebras	118	131–149
GETOOR, R. K. and BLUMENTHAL, R. M. Additive functionals of Markov processes in duality	112_1	131–163
GIL DE LAMADRID, JESÚS. Measures and tensors	114_1	98–121
GILLMAN, D. S. Sequentially 1-ULC tori	111_3	449–456
GILMER, ROBERT and OHM, JACK. Primary ideals and valuation ideals	117	237–250
GILMER, R. W., JR. and MOTT, J. L. Multiplication rings as rings in which ideals with prime radical are primary	114_1	40–52
GINSBURG, SEYMOUR and ISBELL, J. R. The category of cofinal types. I	116	386–393
GINSBURG, SEYMOUR and SPANIER, E. H. Bounded ALGOL-like languages	113_2	333–368
GINZBURG, ABRAHAM and YOELI, MICHAEL. Products of automata and the problem of covering	116	253–265
GLADSTONE, M. D. Some ways of constructing a propositional calculus of any required degree of unsolvability	118	192–210
GLICKSBERG, I. Some uncomplemented function algebras	111_1	121–137
GOLDBERG, S. I. and BISHOP, R. L. Some implications of the generalized Gauss-Bonnet theorem	112_3	508–535
GORDON, B. and MOTZKIN, T. S. On the zeros of polynomials over division rings	116	218–226
GORDON, HUGH and COMFORT, W. W. Disjoint open subsets of $\beta X \setminus X$	111_3	513–520
GRANIER, EDMOND. A theorem on amenable semigroups	111_3	367–379
GREENBERG, M. J. Algebraic rings	111_3	472–481
GROSS, FRED. Generalized Taylor series and orders and types of entire functions of several complex variables	120_1	124–144
GUDDER, S. P. Spectral methods for a generalized probability theory	119_3	428–442
GUILLEMIN, VICTOR. The integrability problem for G-structures	116	544–560
HAGIS, PETER, JR. On a class of partitions with distinct summands	112_3	401–415
——— A correction of some theorems on partitions	118	550
HAIMO, D. T. Integral equations associated with Hankel convolutions	116	330–375
HAIMOVICI, MENDEL. Sur l'intégration des systèmes de Pfaff complets	111_3	423–439

	Vol.	Pages
HAJIAN, A. B. and ITO, YUJI. Iterates of measurable transformations and Markov operators	117	371–386
HAMSTROM, MARY-ELIZABETH. Homotopy properties of the space of homeomorphisms on P^2 and the Klein bottle	120_1	37–45
HARDIE, K. A. On the Hopf-Toda invariant	112_1	43–54
HARISH-CHANDRA. Invariant eigendistributions on a semisimple Lie group	119_3	457–508
HARRIS, W. A., JR. and SIBUYA, Y. General solution of nonlinear difference equations	115	62–75
HARROLD, O. G., JR. A characterization of locally Euclidean spaces	118	1–16
HARTMAN, PHILIP. On isometric immersions in Euclidean space of manifolds with non-negative sectional curvatures	115	94–109
HARTMANIS, J. and STEARNS, R. E. On the computational complexity of algorithms	117	285–306
HAY, LOUISE. On creative sets and indices of partial recursive functions	120_2	359–367
HAYES, D. R. The distribution of irreducibles in GF[q, x]	117	101–127
HELLER, A. and REINER, I. Grothendieck groups of orders in semi-simple algebras	112_2	344–355
HEMPEL, JOHN. A surface in S^3 is tame if it can be deformed into each complementary domain	111_2	273–287
HENDERSON, D. W. Extensions of Dehn's lemma and the loop theorem	120_3	448–469
——— Self-unlinked simple closed curves	120_3	470–480
HENRIKSEN, M. and JERISON, M. The space of minimal prime ideals of a commutative ring	115	110–130
HIMMELBERG, C. J. Some theorems on equiconnected and locally equiconnected spaces	115	43–53
HINRICHS, L. A. The existence of topologies on field extensions	113_2	397–405
HOFFMAN, A. J. and RAY-CHAUDHURI, D. K. On the line graph of a symmetric balanced incomplete block design	116	238–252
HOFFMAN, KENNETH and ROSSI, HUGO. Function theory and multiplicative linear functionals	116	536–543
HOLLAND, S. S., JR. Distributivity and perspectivity in orthomodular lattices	112_2	330–343
HORNER, J. M. Generalized Rodriguez formula solutions for certain linear differential equations	115	31–42
——— On spherical Bessel functions	118	211–220
HSIANG, W. C. and WALL, C. T. C. Orientability of manifolds for generalised homology theories	118	352–359

	Vol.	Pages
HUDSON, S. N. Lie loops with invariant uniformities	115	417–432
—— Lie loops with invariant uniformities. II	118	526–533
HUNGERFORD, T. W. Bockstein spectra	115	225–241
——Multiple Künneth formulas for Abelian groups	118	257–275
HUNT, R. W. Oscillation properties of even-order linear differential equations	115	54–61
HUNTER, R. P., KOCH, R. J. and ANDERSON, L. W. Some results on stability in semigroups	117	521–529
HUNTER, ULYSSES. Essential cluster sets	119_3	380–388
IONESCU TULCEA, A. On the category of certain classes of transformations in ergodic theory	114_1	261–279
ISBELL, J. R. The category of cofinal types. II	116	394–416
ISBELL, J. R. and GINSBURG, SEYMOUR. The category of cofinal types. I	116	386–393
ITO, NOBURO. Transitive permutation groups of degree $p=2q+1$, p and q being prime numbers. II	113_3	454–487
—— Transitive permutation groups of degree $p=2q+1$, p and q being prime numbers. III	116	151–166
ITO, YUJI and HAJIAN, A. B. Iterates of measurable transformations and Markov operators	117	371–386
JAMES, R. C. Weakly compact sets	113_1	129–140
JAMISON, BENTON. Ergoduc decompositions induced by certain Markov operators	117	451–468
JANS, J. P. and CURTIS, C. W. On algebras with a finite number of indecomposable modules	114_1	122–132
JENKINS, HOWARD. On the behavior of solutions of quasi-linear elliptic equations	119_3	407–416
JENKINS, J. A. On Bieberbach-Eilenberg functions. III	119_2	195–215
JERISON, M. and HENRIKSEN, M. The space of minimal prime ideals of a commutative ring	115	110–130
JOHNSON, R. E. Distinguished rings of linear transformations	111_3	400–412
—— Rings with zero right and left singular ideals	118	150–157
—— Potent rings	119_3	524–534
KANIEL, S. Unbounded normal operators in Hilbert space	113_3	488–511
KANTOROVITZ, SHMUEL. On the characterization of spectral operators	111_1	152–181
—— Classification of operators by means of their operational calculus	115	194–224
—— A Jordan decomposition for operators in Banach space	120_3	526–550
KAPLAN, SAMUEL. The second dual of the space of continuous functions. IV	113_3	512–546

	Vol.	Pages
KARLIN, SAMUEL. Total positivity, absorption probabilities and applications	111_1	33–107
——— The existence of eigenvalues for integral operators	113_1	1–17
KATZ, MELVIN and BAUM, L. E. Convergence rates in the law of large numbers	120_1	108–123
KAWATA, TATSUO. Fourier analysis of non-stationary stochastic processes	118	276–302
KEISLER, H. J. Reduced products and Horn classes	117	307–328
KENNISON, J. F. Reflective functois in general topology and elsewhere	118	303–315
KESARWANI, R. N. A pair of unsymmetrical Fourier kernels	115	356–369
KLEPPNER, ADAM. Intertwining forms for summable induced representations	112_1	164–183
KLOTZ, TILLA. Further geometric consequences of conformal structure	112_1	67–78
KNUTH, D. E. A class of projective planes	115	541–549
KOBAYASHI SHOSHICHI and CHU, HSIN. The automorphism group of a geometric structure	113_1	141–150
KOCH, R. J. and COHEN, HASKELL. Acyclic semigroups and multiplications on two-manifolds	118	420–427
KOCH, R. J., ANDERSON, L. W. and HUNTER, R. P. Some results on stability and semigroups	117	521–529
KOH, S. S. On affine symmetric spaces	119_2	291–309
KOHLS, C. W. Prime z-filters on completely regular spaces	120_2	236–246
KONHEIM, A. G., ADLER, R. L., and MCANDREW, M. H. Topological entropy	114_2	309–319
KOPPELMAN, WALTER. Spectral multiplicity theory for a class of singular integral operators	113_1	87–100
KOREVAAR, J. and LANGE, J. E. Limits of polynomials whose zeros lie in a radial set	114	65–79
KOSIER, FRANK. A generalization of alternative rings	112_1	32–42
KRALL, A. M. A nonhomogeneous eigenfunction expansion	117	352–361
KREIMER, H. F. The foundations for an extension of differential algebra	111_3	482–492
——— An extension of differential Galois theory	118	247–256
